Sector-Based Work Academies

Looking for a job? We can help you with getting the right skills, perfecting your CV and guaranteed interviews with employers.

ATTFE College works with a range of local employers including Amazon, McDonald's, and Portland College.

We deliver a range of sector-based work academy programmes for a variety of job roles including care, warehousing, hospitality, and education.

Our Sector-based Work Academies give you the opportunity to learn new skills and get experience of working in a particular industry, support with the application process and a guaranteed interview.

Each programme lasts up to two weeks, and consists of three parts:

- Pre-employment training – we will take you through what is involved with the role you are applying for and skills relating to that role
- Simulated work experience and support with the application process
- At the end of the program, a guaranteed interview with the employer.

Participants will continue to receive benefits whilst taking part in the programme, and if you need to travel to the employer's place of work or to where the training is held, you may be able to receive help covering the cost of public transport or appropriate childcare.

The programme is designed to help improve job prospects, help employers fill jobs, as it is linked to one or more genuine job vacancy. While you are not guaranteed to get a job from completing the programme, it does help you to improve your chances of gaining employment in that sector.

Carpentry and Joinery Skills

ATTFE College

Tuesdays, 4pm - 6pm

Tuesday 18th April - Tuesday 23rd May 2023

Venue: ATTFE College, Sutton Community Academy

The Carpentry and Joinery course is designed for learners to learn the basics of Health, Safety and welfare in construction, the Construction Industry, basic tool and equipment usage, basic materials and basic practical skills.

The course has been developed to allow all learners to undertake specific carpentry and joinery practical tasks in line with industry standards, to learn theoretical knowledge to complete two-unit assessments and to develop a rounded skill level in construction-based work.

Progression:

Progression from this beginners course will be onto the Level 1 course. Learners can then progress onto the Level 2 diploma, which develops the skills and knowledge of the industry further.

Progression to the Level 3 Diploma can lead to site management roles, as well as higher level learning at College and University; through the HNC, HND and Degree courses.
