

Digital Skills Project Case Study

Tutor: Michelle Jones

Learner: Simon Wood

I enjoyed the 5 weeks Introduction to Digital Skills, it gave me more confidence to work with computers and it was comforting to know other people where in the same situation as me. After doing the course, I have now enrolled on another course for 15 weeks to learn and develop my computer skills. Michelle was a great, warm and welcoming tutor, and I would recommend anyone doing this course. Thanks Michelle!

Learner: Agnieszka Wrezel

My name is Agnieszka Wrezel and I wanted to share my feedback on the Digital Skills (IT) course, as I found it to be an incredibly rewarding experience. The course was not only well-organized, but also engaging from start to finish. The lessons were practical and easy to follow, which made my learning process smooth and enjoyable.

I particularly appreciated how the course helped me improve my skills, providing both theoretical insights and practical applications that I can now confidently use. Michelle's tutoring style was clear, supportive, and kept me motivated throughout.

Overall, I gained a lot from the course and would highly recommend it to anyone looking to deepen their understanding of digital skills.

Thank you for offering such a fantastic learning opportunity.
