

Case Study:

Discovering New Skills through Photo Editing at ATTFE College

Learner: Ann Griffiths, Tutor: Jordan Stubbs

When I joined the photo editing course at ATTFE College, my goal was simple: to gain a basic understanding of editing photos. However, the experience turned out to be far more enriching than I had imagined.

One of the key skills I learned was how to use layers to combine different images seamlessly, making them appear as one cohesive photo. This was a fascinating process, and with the guidance of our tutor, Jordan, it became much easier to grasp. Jordan prepared detailed PowerPoint slides for us, which we reviewed together during class. These materials were incredibly helpful in understanding the core concepts of photo editing.

The highlight of the course for me was creating my very own custom Christmas card using the techniques I had learned. It was such a rewarding experience, and I felt so proud to see the final result. When I shared my work with my partner, he was thrilled and proud of the growth and skills I had developed.

Looking ahead, I'm eager to continue my journey with photo editing and dive deeper into more advanced techniques. This course has given me the confidence to explore further and take on new creative challenges.

I would wholeheartedly recommend ATTFE College to my friends and family. The supportive and friendly environment, combined with the expertise of the tutors, makes learning a truly enjoyable experience.
